Pressure Control Valves

Backpressure Regulators UV 4.4

Epoxy-coated Cast Valve for medium Flow Rates

Technical Data

Connection DN Nominal Pressure PN Inlet Pressure K_{vs}-Value Temperature Medium 50 - 150 16, 25, 40 max. 12 bar 17 - 155 m³/h 70 °C water

Description

Medium-controlled overflow valves are simple control valves offering accurate control while being easy to install and maintain. They control the pressure upstream of the valve without requiring pneumatic or electrical control elements.

The UV 4.4 overflow valve is a piston-controlled, spring-loaded proportional regulator with relief for large throughputs. The valve housing is made of spheroidal graphite iron with a continuous epoxy coating while the valve cone is soft-sealed.

The inlet pressure to be controlled is balanced across the valve seat by the force of the valve spring (set pressure). If the inlet pressure rises above the set pressure, the valve opens. With decreasing inlet pressure the valve control orifice reduces, when the pipeline is depressurised the valve is closed. Rotating the adjusting screw clockwise increases the inlet pressure.

These valves are no shut-off elements ensuring a tight closing of the valve. In accordance with the VDI/VDE guideline 2174 a leakage rate of 0.05 percent of the constant volume flow is permitted for the valve in closed position.

Standard

- » body made of spheroidal graphite iron with an epoxy coating
- » closed bonnet
- » internal control bore

Options

- » pressure gauge pre-installed
- » other inlet pressure ranges on request
- » special designs on request

Operating instructions, know how and safety instructions must be observed. All the pressure has always been indicated as overpressure. We reserve the right to alter technical specifications without notice.

K_{vs}-Values[m³/h]

| nominal diameter DN | | | | | | |
|---------------------|----|----|-----|-----|-----|--|
| 50 | 65 | 80 | 100 | 125 | 150 | |
| 17 | 29 | 43 | 68 | 104 | 155 | |
| 17 | 29 | 45 | 00 | 104 | 155 | |

Setting Ranges [bar], Nominal Pressure PN, max. Permissible

| Reduction Ratio | | | | | | |
|-----------------|---------|--------|--|--|--|--|
| bar | 1,5 - 6 | 5 - 12 | | | | |
| PN | 40 | 40 | | | | |
| max. ∆p | 1 | : 5 | | | | |
